(45 48N-133 39E)

25X1

The purpose of this report is to review recent photography of the Iman Army Barracks, Sebuchar and its environs for evidence of military activity and equipment with a view to establishing the type and size of military units occupying this installation.

25X1

NPIC Report [] Soviet Order of Battle - Far East M.D., provides a functional analysis, photographs, and illustrations of this installation and its training facilities.

All references of vehicles and equipment in relationship to the organization of units are derived from the DIA Organization and Logistical Data on Soviet Ground Forces, Part 1, Soviet Ground Force Organization.

SUMMARY

25X1

Analysis of [] has revealed vehicles and equipment of elements of a probable motorized rifle regiment located in the eastern part of the installation (Area J-1, Figures 2 and 3 of the referenced NPIC Report). The major identification features of this unit are probable BTR 60p armored personnel carriers and probable KMM truck mounted treadway bridges.

The following vehicles and equipment were observed in this area on [] (See Figure 2).

25X1

- 53 Probable BTR 60p APC's
- 5 Probable KMM truck mounted treadway bridges.
- 69 Cargo trucks
- 4 Possible UAZ 69 utility trucks.
- 5 Unidentified probable field artillery pieces.
- 9 Possible mortars.
- 22 Unidentified vehicles.
- 7 Unidentified pieces of equipment.

In the western part of the installation (Figures 4 and 5 of the referenced NPIC Report) 14 unidentified tanks were observed in Area E-2 (See Figure 2). Seven unidentified tanks and 20 possible tracked vehicles were also observed in Area J-2.

Although it is not possible to determine the size of the unit in this area from the number of tanks observed, an analysis of the facilities indicates that a large armored unit is probably located in this portion of the installation.

Area E-2 contains 29 vehicle storage buildings and the presence of tanks and trackage in this area on [] and previous coverage indicates at least some of these buildings are utilized as storage for armored vehicles. The tanks observed in Area J-2 and trackage in this area on previous coverage also indicates that some of the vehicle storage buildings in this area are utilized by armored vehicles.

25X1

A large moderately active tracked vehicle driver training course and two tank/assault gun firing ranges are located southeast of this portion of the installation.
